**Re: In the Matter of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I live in a sub-urban area 30 minutes away from one of the major metropolis in US (SF). There are a total of 3 providers in my immediate area (only 1 of which are not using this provision), and my current provider is the only one that offers unlimited data. It is also the cheapest provider in the area for the given speed (\$50 for 20 Mbps, no data cap) without forcing regular cable service down my throat.

The only provider that doesn't rely on this provision is by FAR the worst provider in the area. AT&T only has the extremely slow 1.5 Mbps for a whooping \$40, and it still enforces a data cap of 1TB. That is not a speed any city in the modern world should have, let alone one that is right in the heart of the tech industry.

It is quite clear that major providers do not care for this community. Please do not deregulate the major provider, as it is the only thing that keeps the area from being a joke of a "developed country".
